This contemporary space was designed to meet the needs of an ADA compliant space due to my client being handicapped. When completed, he would be able to use the space easily on his own. The vanity is positioned to accommodate his wheelchair with a wall mount faucet and joy stick. A rain and handheld showerhead allows for easier use of the shower. The overall color scheme is made up of beautiful mother of pearl tile in various black, grey and silver mosaic glass and stone tiles that served as the center line that was carried through the middle of the walls. The "jewelry" is the high polished chrome plumbing fixtures, as well as a product called Schluter, which finishes off the tile edges and base boards to add sparkle. A back-lit mirror opens up the entire space.
